## <Photo #1: AdvanTex® AX-Max™ Treatment Units from Orenco Systems®>

Orenco's AdvanTex® Treatment Systems – like the AX-Max™ units shown here – can be installed in multi-unit arrays. This means each treatment facility can be built in stages and expanded as needed, saving on up-front capital costs.

## <Photo #2: DuraFiber™ Building from Orenco® Composites>

DuraFiber™ Buildings from Orenco® Composites are molded as a single piece of fiberglass with no mechanical fasteners. These composite structures are more cost-effective than concrete or steel and unlike wood, do not rot. A wide variety of options and custom sizes are available.

## <Photo #3: OLS Control Panel from Orenco® Controls>

OLS Control panels from Orenco® Controls contain integrated variable-frequency drives (VFDs) that optimize system performance and reduce energy usage. They're ideal for any pumping application where consistent flow and energy-efficient operation are essential.

## <Photo #4: Orenco® Sewer™ On-Lot Package (coming in 2017)>

Coming in 2017, Orenco's new on-lot package is easy to specify and install, with durable components designed to work together simply and efficiently. The integrated effluent pump has a 10-year warranty available when used in an Orenco® Sewer™.
